P R E F A C E

This is the fifty second issue of the Publication "Estimates of Area and Production of Principal Crops in India". It contains statistics of area, production and yield per acre of principal crops along with the rainfall data. It gives all-India figures for the decennium ending 1958-59 and Statewise data for the quinquennium ending 1958-59.

The detailed work involved in the preparation of this Volume has been done in the Agricultural Intelligence (Estimates) Branch of the Directorate of Economics and Statistics.

New Delhi,

June, 1960.

R. N. Poduval,
Economic and Statistical Advisor,
to the Government of India,
Ministry of Food and Agriculture.

NOTES AND ABBREVIATIONS

NOTES

The figures of area and production for 1956-57 and 1957-58 as given in "Area, Production and Average yield per acre of Principal Crops in India, 1949-50 to 1957-58" - Supplement to September, 1958 issue of the Directorate's monthly Journal "Agricultural Situation in India," and in the various All India Final Crop Estimates for 1957-58 related to 'Partially Revised' and 'Final' Estimates. These figures have been revised in this publication on the basis of final revised figures for 1956-57 that have now become available from the State Government and partially revised figures for 1957-58 as given in the All-India 'Final' Estimates for 1958-59. Data for 1958-59, however, relate to 'Final' estimates. Data for 1957-58 and 1958-59 are, therefore, subject to revision. A statement giving "Partially Revised" Estimates for 1958-59 and 'Final' Estimates for 1959-60 in respect of crops for which All India Final Estimates for 1959-60 have so far been released is given in Appendix I.

2. The method of estimation of area has changed during the past few years in certain States. In Bihar, the State Government have switched over from the chowkidari system of reporting the acreage to that of complete enumeration. In West Bengal, the State Government have changed over from the traditional method of reporting to random sample surveys. The table below indicates the crops along with the years from which the method of estimation has changed in those States.

State	Crops	Year from which the method of estimation has changed.
Bihar	Rice, Maize, Wheat, Barley, Gram, Sugarcane, Jute and Tobacco.	1948-49
	Jowar, Bajra, Ragi, Sesamum, Rape and Mustard, Linseed and Castorseed.	1949-50
West Bengal*	Rice	1947-48
	Gram	1948-49
	Wheat, Barley, Linseed, Rape and Mustard and Jute.	1949-50
	Sugarcane	1950-51
	Jute	1951-52

* - In the case of jute, the acreage was based on random sample surveys in 1949-50 and on eye-estimates in 1950-51. Since 1951-52, it has been based on random sample surveys except in Darjeeling district.

(ii)

3. As a result of investigations carried out over a number of years, the supremacy of the objective technique of Random Sample Crop Cutting Experiments over the traditional method of estimating the production of crops has been established and gradually the States have been carrying out such surveys on more and more crops. The table below gives the crops, along with the years for which production estimates are based on random sample crop cutting experiments in each State.

State	Region	Crops	Year from which the method of crop cutting surveys was adopted.
Andhra Pradesh	Telengana Region	Wheat /	1951-52
		Rice, Jowar, Bajra, Maize.) 1952-53
		Ragi.	1955-56
		Sugarcane.	1956-57
	Andhra Region	Rice.	1953-54
		Jowar, Bajra, Ragi and Sugarcane.) 1954-55
Assam*	-	Rice	1951-52
		Jute, Potato (winter).	1952-53
		Sugarcane.	1957-58
Bihar	-	Rice and Wheat.	1948-49
		Barley and Gram.	1949-50
		Sugarcane and Jute.	1958-59
Bombay	Former Bombay State portion	Rice, Jowar, Bajra.	1949-50
		Maize (Gujarat districts only)	} 1951-52
		Ragi (Ratnagiri and Dangs districts only), cotton, groundnut, tobacco, gram	
	Vidarbha Region	Rice, Jowar, Wheat, Gram Kodon-kutki, Tur.) 1951-52
		Cotton.	1954-55
		Groundnut.	1957-58
	Marathwada Region	Wheat.	1951-52
		Rice, Jowar, Bajra and Maize.) 1952-53
		Gram.	1956-57
		Groundnut, cotton.	1957-58

State	Region	Crops	Year from which the method of crop cutting surveys was adopted.
	Saurashtra Region	Rice, Wheat, Jowar, Bajra and Gram.) 1956-57)
		Groundnut, Cotton.	1957-58
	Kutch Region	Wheat, Jowar, Bajra, Gram.) 1956-57)
		Groundnut, Cotton.	1957-58
Madhya Pradesh	Mahakoshal Region	Rice, Jowar, Wheat, Gram, Kodon-kutki, Tur.) 1951-52)
		Bajra.	1956-57
		Barley, Groundnut, Rape & Mustard, linseed, Potato.) 1957-58)
	Vindhya Pradesh Region	Rice, Jowar, Maize, & Wheat, Barley, Gram.) 1952-53)
		Bajra.	1956-57
		Tur, Groundnut, Rape and Mustard, Linseed, Potato.) 1957-58)
	Bhopal Region	Rice, Jowar, Wheat. Gram.	1951-52) 1952-53
		Barley, Tur, Groundnut, Rape & Mustard, Lin- seed, Potato.) 1957-58)
	Madhya Bharat Region	Rice, Jowar.	1955-56
		Bajra, Gram.	1956-57
		Wheat, Barley, Tur, Groundnut, Rape & Mustard, Linseed, Potato.) 1957-58)
Madras		Rice, Jowar, Bajra, Ragi.) 1955-56)
Punjab	Including Pepsu	Wheat, Gram.	1951-52
		Bajra, Maize.	1952-53
	Former Punjab State &	Rice, Barley.	1951-52
		Jowar.	1952-53
Uttar Pradesh		Wheat, Barley, Gram	1949-50
		Rice, Jowar, Bajra, Maize.) 1950-51)
		Tur.	1951-52
		Jute	1955-56
		Groundnut and Rape & Mustard (Rape seed)) 1957-58)

State	Region	Crops	Year from which the method of crop cutting surveys was adopted.
West Bengal@		Rice.	1947-48
		Wheat, Barley, Gram, Rape & Mustard, Linseed and Jute.	1949-50
		Sugarcane.	1950-51
		Jute, Potato (winter).	1951-52
		Tur.	1952-53
Mysore	Old State	Rice, Jowar, Bajra and Ragi.	1951-52
	Coorg Region	Rice.	1952-53
Rajasthan	Old State (i.e. excluding Ajmer)	Wheat, Barley, Gram.	1951-52
		Jowar, Bajra, Maize.	1952-53
		Cotton.	1953-54
		Rape and Mustard	1957-58
	Ajmer	Wheat.	1952-53
		Jowar, Maize, Barley.	1953-54
		Gram, Cotton.	1956-57
		Rape & Mustard.	1957-58
Delhi		Wheat.**	1952-53
Himachal Pradesh		Rice, Wheat.	1953-54

/- Discontinued since reorganisation.

§ - Includes Pepsu after reorganisation.

£ - Experiments were not conducted during 1956-57 and 1957-58.

@ - In the case of Jute, production was based on random sample survey in 1949-50 and on eye-estimates in 1950-51. Since 1951-52, it has been based on random sample surveys except in the case of Darjeeling district.

* - Plains only.

** - Production estimates have been based on the traditional method since 1955-56 as the results of crop-cutting experiments have not been available on a regular basis since that year.

4. The variation in coverage and changes in method have introduced an element of non-comparability over a large number of years. Thus, the absolute figures of area and production published from year to year are not strictly comparable due to changes in coverage and method of estimation. The variations in coverage since 1949-50 have, however, been small and therefore do not affect much the comparability of acreage data from that year. The improvements in the method of estimation of rates of yield and total production were introduced mainly after 1949-50 especially in the case of food grains and have thus introduced an element of non-comparability in those estimates considered over a period of time. While these developments have improved the quality of the absolute figures of production released from year to year, the absolute figures are not strictly comparable. A series of index numbers of agricultural production has, however, been constructed and this series seeks to link up the production of each year with that of 1949-50 through pairs of comparable figures for each two successive years which are available under our system of crop estimation. These indices of agricultural production as published from year to year in the monthly journal 'Agricultural Situation in India' indicate correctly the real trend in the production of any agricultural commodity. Since the absolute figures of production given in this issue are based on the best estimates that the States could frame from year to year, it is not possible to make any changes in them. In any study of the trends of agricultural production, the correct procedure would be to compare the figures given in a particular crop estimate for the current and the previous year and to use the index number for making comparisons over any longer period.

5. The crops given in this publication are broadly divided into three groups viz. Forecast crops, Non-forecast crops and Plantation crops.

Forecast Crops:- These include Rice, Jowar, Bajra, Maize, Ragi, Small Millets, Wheat, Barley, Gram, Tur, Other Pulses, Potato, Sugarcane, Ginger, Pepper, Chillies, Tobacco, Groundnut, Castorseed, Sesamum, Rape and Mustard, Linseed, Cotton, Jute and Mesta. Regular all-India estimates are issued for them. The figures in respect of cereals and gram relate to both reporting and non-reporting areas while those for other crops refer to 'reporting areas only'. Figures for 'non-reporting' areas for other crops are not available. Estimates of area and production of food-grains for the 'non-reporting' areas for 1949-50 to 1958-59 are based either on special returns received from the State Governments or information available in the Season and Crop Reports and to Returns of Agricultural Statistics. The figures for the "reporting" areas upto 1956-57 are Revised Estimates, while those for 1957-58 and 1958-59 are 'Partially Revised' and 'Final Estimates' respectively. The figures for 1957-58 and 1958-59 are, therefore, subject to revision. The figures for the years 1949-50 to 1958-59 are not strictly comparable with those for earlier years in the case of States where there has been either an extension in coverage or changes in the method of estimation.

Non-forecast crops:- These cover Bananas (including Plantations) Papaya, Sweet-potatoes, Tapioca, Turmeric, Sann-hemp, Indigo, Lac, Opium, Cashewnuts, Cardamom and Betelnuts. Estimates of area and production of these crops are ad hoc as distinct from the regular estimates of forecast crops, and therefore, do not have the same degree of accuracy as the forecast crops. They are necessarily tentative and their reliability cannot be vouchsafed.

Plantation crops:- Plantation crops include Tea, Coffee, Rubber and Coconuts. Estimates of area and production of Tea, Coffee, and Rubber are based on special returns received from the State Governments in connection with all-India publications on these crops. Data for these crops are provisional as they have generally been estimated in the absence of revised data for certain States according to reorganized set-up. The estimates for Coconuts are again ad hoc estimates similar to those of Non-forecast crops.

6. (a) Data for Assam exclude N.E.F.A.
(b) Data for Jammu & Kashmir exclude the Pakistan-held portion of the State.
(c) Data in respect of foodgrains for Madhya Pradesh are inclusive of estimates for crop grown in forest areas also.
(d) Data for Bombay given in the Publications relate to present Maharashtra State (including Gujarat).
7. Figures of Tea and Rubber relate to calendar years i.e. figures for 1947-48 relate to 1947 and so on.
8. Data for 1958-59 in respect of Tea and Coffee have not yet become available.
9. Average yields per acre given in this publication have been obtained by dividing the total production by the corresponding total acreage under each crop. In case of Tea and Coffee, they relate to 'plucked' area and in the case of Rubber to 'tapped' area.
10. Data in respect of lac are as furnished by the Indian Central Lac Cess Committee and those of Opium by the Narcotics Commissioner, Simla.
11. Production of Sann-hemp is estimated in terms of dry fibre.
12. Figures for sesamum, rapeseed and mustard and linseed in the case of U.P. are inclusive of estimates for areas sown under 'Mixed crops'.
13. Production of sugarcane is expressed both in terms of cane and raw sugar (gur or jaggery).
14. Production of groundnut is given in terms of 'Nuts in shell'.
15. Production of cotton is given in terms of 'Lint Cotton' and in bales of 392 lbs. each.
16. Production data of cottonseed are provisional as they have been worked out on the basis of approximate lint to seed ratio.
17. Production of jute and mesta is given in terms of fibre and in bales of 400 lbs. each.
18. '•' Production of non-forecast crops in case of Bombay State has been worked out (due to the non-supply of data by the State Government) on the basis of the latest available yield per acre of respective crops.

ABBREVIATIONS:

- (a) - Less than 500 acres.
- (b) - Less than 500 tons (unless otherwise stated)
- (c) - Less than 500 lbs.
- N.A.- Not Available.
- Neg.- Negligible.
- (P) - Provisional.

Appendix - I

Area and Production of Forecast Crops 1959-60
and 1958-59

Crop	Area (Thousand acres)		Production (Thousand tons unless otherwise stated)	
	1959-60 (Final Estimate)	1958-59 (Partially Revised)	1959-60 (Final Estimate)	1958-59 (Partially Revised)
(1)	(2)	(3)	(4)	(5)
Rice	81,343	81,437	29,338	30,354
Jowar	41,602	42,584	7,867	8,714
Bajra	26,699	27,999	3,484	3,789
Maize	10,457	10,457	3,615	3,381
Ragi	6,211	6,192	1,860	1,877
Small Millets	12,340	12,417	2,012	2,072
Wheat	31,508	31,141	9,784	9,772
Barley	8,220	8,243	2,605	2,672
Gram	25,046	24,865	5,390	6,881
Tur	5,843	5,931	1,589	1,371
Other Kharif Pulses	16,075	15,597	1,567	1,559
Other Rabi Pulses	12,788	12,992	2,690	2,761
Potato	885	858	2,719	2,327
Sugarcane (Cur)	5,178	4,803	7,579	7,213
Ginger (Dry)	37.0	35.7	15.1	12.3
Pepper (Black)	232.0	230.1	25.4	25.5
Chillies (Dry)	1,499	1,471	333	326
Tobacco	934	897	261	261
Groundnut	15,305	14,575	4,390*	4,812*
Castorseed	1,178	1,203	109	112
Sesamum	5,510	5,500	322	311
Rapeseed & Mustard	7,167	6,021	1,037	1,025
Linseed	3,921	3,966	425	427
Cotton	19,252	19,926	3,335†	4,586†
Jute	1,707	1,811	4,543‡	5,153‡
Mesta	706	825	1,008‡	1,163‡
Sannhemp	813	807	306	316

† - In terms of thousand bales of 400 lbs. each.

* - Nuts in shell.

@ - Related to fibre only.

‡ - In terms of thousand bales of 392 lbs. each.
